**Every detail counts, where atmosphere is the aim.**

## Wiring Accessories

## Individual in form and colour.

Contrasts merge to form a unique unit. Beauty begins beyond the usual appearance and where convention ends. Even in rooms. The switch series **solo**<sup>®</sup> combines contrasting colours and forms to create a perfected harmony. A stylistic class for everyone who likes and lives for something special.

The "essential features" become evident when reductions are made.

When the eye rests it can focus on the essential features. Concentration on plain functionalism fascinates with its clarity and independence. The attraction of **future**<sup>®</sup> and **future**<sup>®</sup> **linear** lies in its uncompromising, straight forward design. Combining defined colours – complementary to an up-to-date, architectonic concept – it is independent of time and fashion.

**future®**

## Understatement with clear structures.

**C**arat is our clear commitment to sophisticated design. The language of straight lines and genuine materials instead of imitations are combined to give a high-quality shape. As an independent object, the switch from the **carat**<sup>®</sup> series becomes an integral component of a high-grade representative architecture.

carat®

Pure and sensual.  
Extravagant and noble.

## Setting the tone. Leading the way.

Properly setting tones is an art. With fresh colours, enjoy the spatial experience of a room. **Busch-axcent** appears weightless. Its design is uncompromisingly linear. Its colours are unique. They correspond with the modern stylish decor. They create atmosphere. They also provide orientation - right down to the control system of modern architecture.

**Busch-*axcent***

## Clarity and strength of expression.

Nature is the inspiration with the highly expressive, clear colours of its precious stones and metals, rare minerals and natural substances. ***alpha exclusive***<sup>®</sup> captures these impressions and combines them to form a composition full of strength and energy. The perfected design is appealing with its classical and valuable charm. The colour shades set exclusive and unmistakable accents in all the rooms.

*alpha exclusive*<sup>®</sup>

One-of-a-kind and distinctive.

## Proportions and colours in unison.

Peace and harmony create an atmosphere of equilibrium. Well-balanced proportions allow a great deal of possibilities. With details such as a soft, reduced structure and broad spectrum of colours, the ***alpha nea***<sup>®</sup> has an unobtrusive effect, yet still remains impressive. A switch that adapts to almost any interior design.

## Light and form in perfect harmony.

In contrasts between light and dark, colours and forms become particularly prominent.

*impuls* merges these impressions into an extraordinary design and an innovative technology with permanent light radiance. Clear straight lines are combined with the soft elegance of the circle, thereby creating contrasts that are fascinating. This switch is also conspicuous in the dark with its well-thought out design and convincing functionality – permanent discreet lighting ensures safe orientation and highlights the interplay of these forms.

**Timeless aestheticism.**

**T**here are landscapes and natural phenomena that fascinate time and again. The colours and forms are unobtrusive and yet leave a lasting impression. The **Reflex SI/Reflex SI Linear** switch series consists of two different lines of design – gently rounded or objectively square.

**Reflex SI**

Outstanding. Clear. Constant.

**H**e who seeks the outstanding must leave the usual behind and cross frontiers.

*pure stainless steel* is one hundred per cent uncompromising. In its design, in its material qualities, in its constant effect. In the consistency of this idea, the new quality claim becomes clear: the perfect combination of aesthetics, function and long life. Pointing to the future.

**Light comes. Light goes.**

**T**he changing light, which is often random in nature, allows us really to perceive our environment. The **Comfort Switch** does this in a special way. It combines four comfort stages in only one switch.

**Busch Comfort Switch\***

## New ways in switching.

**Busch Comfort Switch<sup>1</sup>**  
**2gang Combination Comfort Switch**  
**Outlet.** Colour: davos

### The switch with four operating modes

**Basic comfort:** Switches in the normal way.

**Medium comfort:** Automatic switching-on function but is switched off by hand – sometimes less automation is preferable.

**Timing comfort:** Manual switch-on function but with automatic switching-off function – you can determine the length of the time interval.

**Maximum comfort:** Fully automatic switching.

**Busch 2gang Dimmer**  
**solo<sup>®</sup>.** Colour: davos

### Two dimmers in one

Two lights dim independently of each other with the press of a button. The orientation light on the dimmer makes it easy to find in the dark.

### Automatically in the right light

Reacting to movement, the light automatically switches on. Leaving the detection zone, the light automatically switches off again.

### Central and convenient operation and display

Delivers all kinds of information from all around the house and includes the control option which otherwise is only provided by two additional switches.

<sup>1</sup> available in all switch programmes

<sup>2</sup> for ABB Powernet KNX and ABB i-bus® KNX.
